REGION 6 CLP QA REVIEW**

CASE 36975 SDG F2GP7 SITE Jones Road Ground Water Plume LAB SHEALY

COMMENTS: This SDG consisted of 20 water samples for TVOA analysis following SOW SOM01.2. The OTR/COC Records designated sample F2H38 for laboratory QC analyses, sample F2HF3 as a trip blank, and sample F2HH3 as a field blank. Trip blank sample F2HF1 (SDG F2HF1) was associated with some of the field samples in this SDG.

The target compounds of concern with the user's desired detection limits in parentheses are vinyl chloride (2 µg/L), cis/trans-1,2-dichloroethenes (7 µg/L), and tetrachloroethene (5 µg/L). All samples met the user's desired detection limit criteria. None of the target compounds of concern were detected in the samples. The laboratory reanalyzed sample F2H44 because DMC recoveries failed contractual requirements for the original analysis. Since the reanalysis had acceptable DMC recoveries, the laboratory should not have reported the original analysis.

Modified CADRE Review was performed for this package as requested by the Region. For this review option, the CCS and CADRE primarily determine the laboratory contractual compliance and the technical usability of the sample results, respectively. The raw data review is limited to that performed by CADRE on the staged electronic data deliverables (SEDD). The reviewer performs supplemental hardcopy forms checking and applies Region 6 guidelines, where necessary, to account for known limitations of the electronic review process. Therefore, the reviewer's final assessments may deviate from those found in the CADRE report. The CADRE narrative for the SDG is attached to this report as an addendum for additional information.

DATA ASSESSMENT: The QC problems affecting data usability are addressed below.

- The effects of the laboratory contamination are summarized below.

The laboratory "B"-flagged results below the CRQL's and all other chloromethane results below the CRQL should be considered undetected and were flagged "U" at the CRQL's on the DST.

The results above the CRQL's for chloromethane for samples F2H39, F2H40, and F2H42 and acetone for samples F2H40, F2H42, and F2HJ8 were qualified as undetected ("U"), and the concentrations should be used as raised quantitation limits ("M").

ORGANIC QA REVIEW
CONTINUATION PAGE

CASE 36975 SDG F2GP7 SITE Jones Road Ground Water Plume LAB SHEALY

- The effect of the field contamination is summarized below.

All 2-butanone and m,p-xylene results below the CRQL's should be considered undetected and were flagged "U" at the CRQL's on the DST.

OVERALL ASSESSMENT: Some results were qualified for samples F2H39, F2H40, F2H42, and F2HJ8 because of problems with laboratory contamination. ESAT's final data qualifiers in the Data Summary Table (DST) indicate the technical usability of all reported sample results. An Evidence Audit was conducted for the Complete Sample Delivery Group File (CSF), and the audit results were reported on the Evidence Inventory Checklist.

ORGANIC DATA QUALIFIER DEFINITIONS

The following definitions provide brief explanations of the ESAT-Region 6 qualifiers assigned to results in the Data Summary Table.

- U** Not detected at reported quantitation limit.
- N** Identification is tentative.
- J** Estimated value.
- L** Reported concentration is below the CRQL.
- M** Reported concentration should be used as a raised quantitation limit because of interferences and/or laboratory contamination.
- R** Unusable.
- ^** High biased. Actual concentration may be lower than the concentration reported.
- v** Low biased. Actual concentration may be higher than the concentration reported.
- F+** A false positive exists.
- F-** A false negative exists.
- UJ** Estimated quantitation limit.
- T** Identification is questionable because of absence of other commonly coexisting pesticides.
- C** Identification of pesticide or aroclor has been confirmed by Gas Chromatography/Mass Spectrometer (GC/MS).
- X** Identification of pesticide or aroclor could not be confirmed by GC/MS when attempted.
- *** Result not recommended for use because of associated QA/QC performance inferior to that from other analysis.

CSF Deliverables

Summary of Questions/Issues:

1. Although the original CSF should be submitted to the Region, the whole data package except pages 3, 452-459, and Form DC-2 appear to be photocopies (SOM01.2, B-5 and B8, Table 1 and Note 3). Please indicate the location of the original data package.
2. On the SDG Cover Sheet, the "Last Sample Receipt Date" was recorded as 11/06/07, which does not agree with all other shipping/receiving documents and information. Please correct and resubmit this page.

NOTE: Any laboratory resubmission should be submitted either as an addendum to the original CSF with a revised Form DC-2 or submitted as a new CSF with a new Form DC-2 except for replacement pages (SOM01.1, B-33, 2.6.3). Custody seals are required for all such shipments.
